

## **WHO SHOULD CONSIDER VOLUNTEERING SHORT-TERM**

- families wanting to help their children understand the realities of poverty and need
- past long-term OSSO volunteers who want to visit the children they love
- OSSO donors, or potential donors, who want to see how OSSO uses their money
- couples seeking an unforgettable vacation where they focus outside themselves
- family and friends of OSSO's currently serving long-term volunteers who want to visit them and experience for a short time what the volunteer has experienced for months
- individuals wanting an opportunity to give genuine service to abandoned children in a safe, supported environment

*Those who are elderly or have medical problems may want to be cleared by their doctor to participate. Cuenca and Quito are both at about 9,000 feet in elevation and people with heart or lung problems may have difficulty.*
